

ZOMBII

Zombii

Find the money you're silently losing — **and get it back.**

An AI-powered subscription-leak detector. It scans your bank statement, SMS or email, finds every recurring charge, catches silent price hikes and zombie subscriptions, scores the leak — and drafts the cancellation email for you.

Live demo: zombii.vercel.app GitHub: github.com/Mukul07777/zombii

YOU'RE LEAKING

₹24,588

per year, on autopilot

5 subscriptions 1 zombie 2 hikes

Team CityZen · Mukul (Team Lead) · Gauranshi Garg · Pushkar Kumar

InnovaHack Chapter-1 · National Level Hackathon · FinTech

THE PROBLEM

Money leaks out quietly — and no one reads their statement line by line

PROBLEM STATEMENT 1 · FINTECH

Hidden Subscription & Recurring Payment Leak Detector

"Most people are quietly losing money every month to subscriptions they forgot about, price hikes they never noticed, and services they no longer use — buried inside cluttered bank statements, SMS alerts and email inboxes that no one has time to review line by line."

1

Forgotten

Subscriptions you stopped using but keep paying for

2

Silent hikes

Prices creep up and the charge just goes through

3

Unreadable

The answer is in your statement — but no one reads it

THE SOLUTION

Zombii turns an unreadable statement into money back — in seconds

Detect recurring charges

Merchant-cleaning + cadence analysis, with a confidence score

Flag silent price hikes

Relative jump AND statistical z-score anomaly detection

Spot unused 'zombies'

Stale-charge patterns reveal what you no longer use

Score the leak

0–100 leak score per subscription + category cost view

Act, don't just advise

Cancel / downgrade / renegotiate — AI drafts the email

WHAT'S INSIDE

More than a subscription list — it predicts, persuades and acts

Zombie detector

Finds subs that kept charging after you stopped using them

Silent-hike alerts

Catches price rises with the exact before / after

Overlap finder

Duplicate services in one category — waste others miss

Trial Guardian

Predicts free trials about to auto-charge, before they hit

Leak to Wealth sim

What your wasted money becomes if invested instead

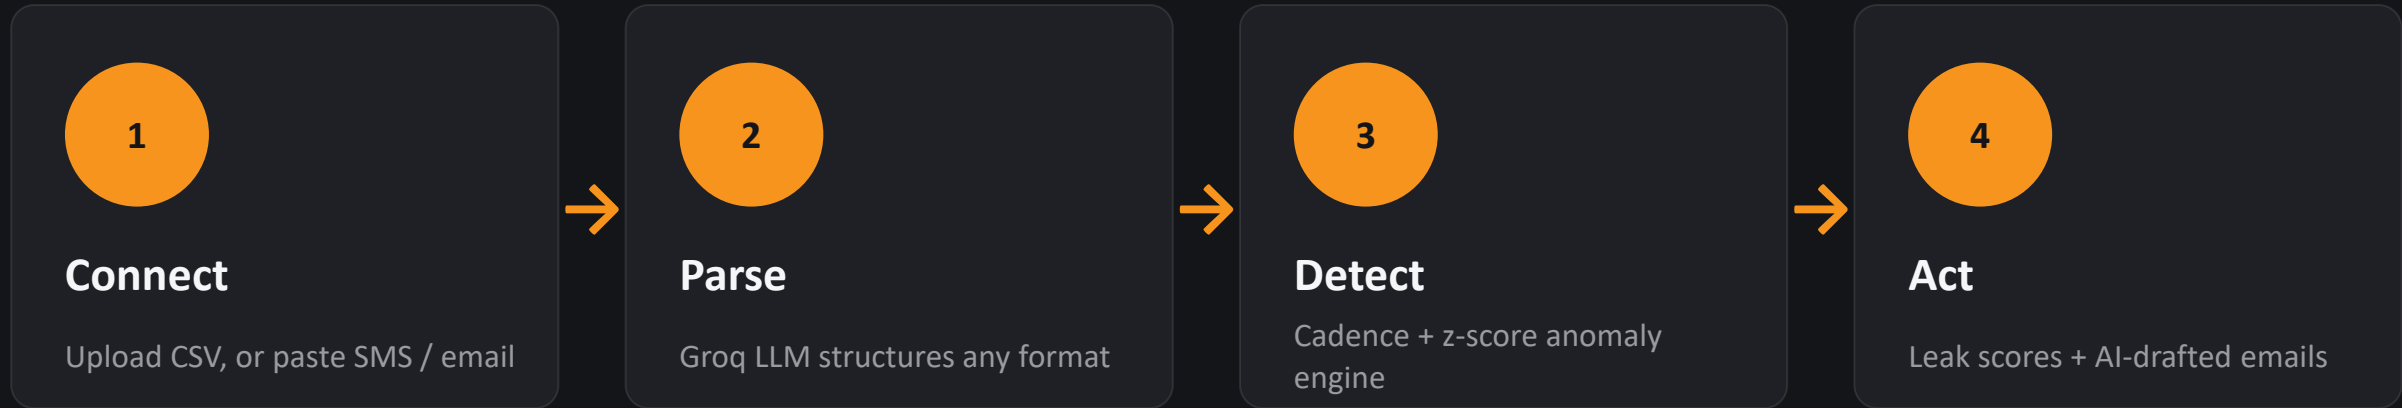

Ask Zombii (AI)

Voice-enabled assistant + AI-drafted cancellation emails

HOW IT WORKS

Agentic parsing + a real detection engine, on serverless

Built with

React · Vite · React Router | Vercel Serverless Functions | Groq · llama-3.3-70b | Node test runner (10 passing) | Dependency-free SVG charts

Privacy by design — statements are analysed on-demand and never stored.

LIVE DEMO

Let's watch Zombii find the money.

1. Upload a statement → 2. Reveal the leak → 3. Kill a zombie → 4. AI writes the email

zombii.vercel.app

WHY IT WINS

Everyone finds leaks. Zombii gets the money back.

Agentic, not heuristic

LLM parses any statement, SMS or email — not just one CSV format

Acts autonomously

Drafts + one-tap sends cancellation & discount-negotiation emails

Finds hidden waste

Overlap detector + Trial Guardian catch money other tools miss

Emotional payoff

Leak to Wealth simulator turns waste into a wake-up call

Real-world & scalable

Stateless serverless — scales on demand. Production path via India's Account Aggregator. Freemium model: free scanning, paid auto-negotiation & monitoring.

ZOMBII

Kill the subscriptions draining you.
